COMPONENTRY

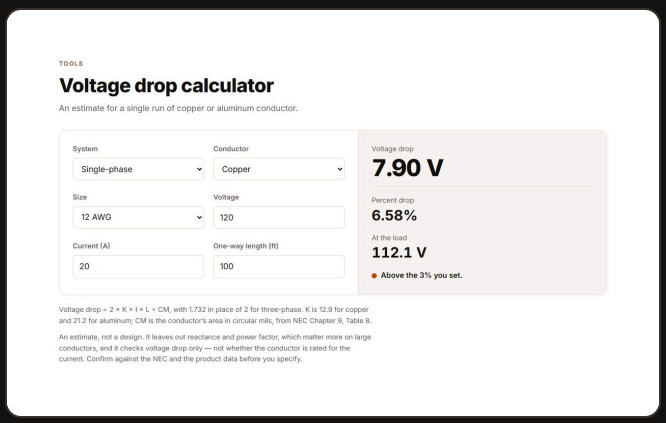

Component Catalog

44 ready-made, on-brand blocks for building southwire.com pages.

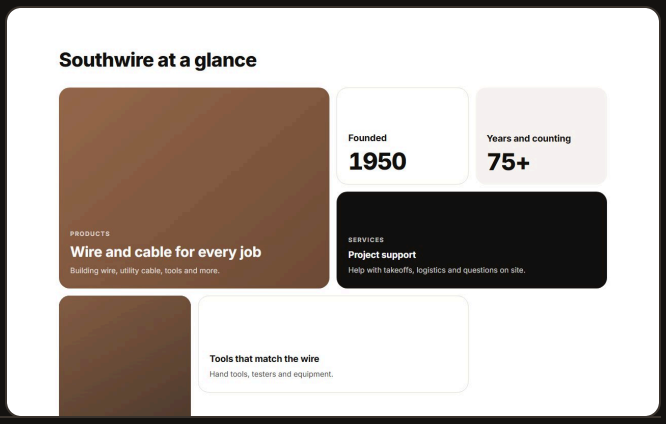

START HERE

What's in the kit

Componentry builds the sections of a southwire.com page: banners, product showcases, FAQs, maps, calculators and more. You fill in fields, see the result as you type, and paste the finished block into SmartEdit. Every block is already on brand.

How it works

1
Pick
Start from a page template, or add blocks one at a time.

2
Edit
Change words, photos, colors and settings in the side panel. No code.

3
Preview
Check desktop and phone, light and dark, before anything goes live.

4
Paste
Export the block and paste it into SmartEdit.

Built into every block

On brand
Southwire copper, Inter type, matching corners and spacing, from one set of brand settings.

Works on phones
Every block rearranges itself for small screens and touch.

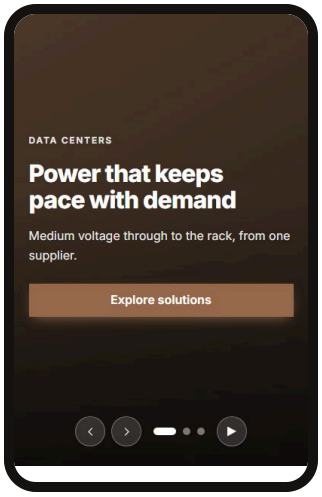

Accessible
Keyboard and screen-reader support, pause buttons for motion, and calmer motion for people who ask for it.

Safe to paste
A block's styles stay inside the block, so it can't break the rest of the page.

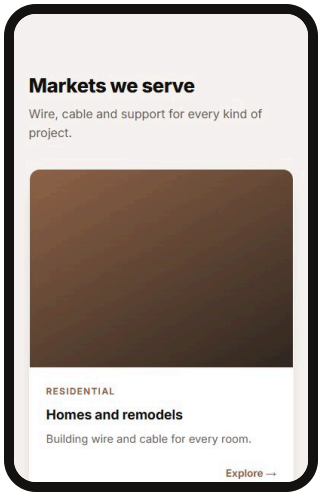

Fast
Images load as you reach them, and videos only load when someone presses play.

Light or dark
One switch moves a block, or a whole page, between light and dark.

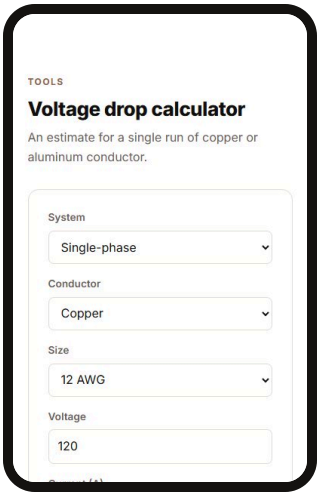

On a phone

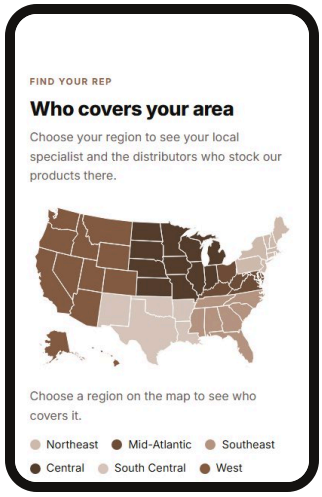

Hero Slider

Card Grid

Voltage Drop Calculator

Territory Map

● No JavaScript Works with no scripts at its default settings, so it keeps working even if a CMS removes them.

Screenshots show sample content. Names, copy and figures in them are placeholders, not Southwire data.

7 BLOCKS

Heroes & Banners

The first thing people see: full-width banners, video and sliders for the top of a page, plus a closing call to action and a notice bar.

Hero Slider

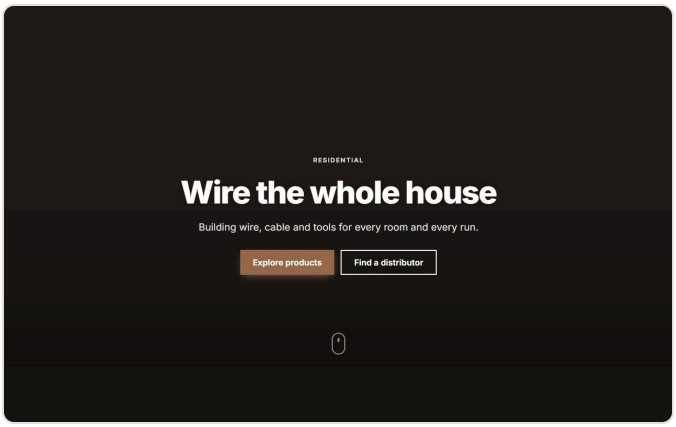

Several banners that take turns at the top of a page. Each has its own photo or background video, headline and buttons, with arrows, dots, swipe and a pause button.

USE IT FOR

Homepage hero, or several campaigns sharing the top spot.

OPTIONS

Photo or video per banner · autoplay timing · arrow and dot styles · parallax scroll effect

Parallax Banner

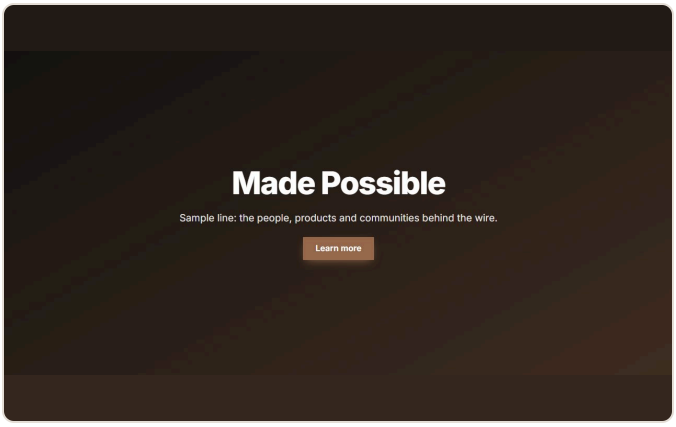

A full-width photo banner with headline and buttons. The photo moves slower than the page, or stays fixed, as you scroll, for a sense of depth.

USE IT FOR

Top of a market or product page: Residential, Utility, Data Centers.

OPTIONS

Depth or fixed photo · zoom as you scroll · headline fades as it leaves · overlay

Video Hero

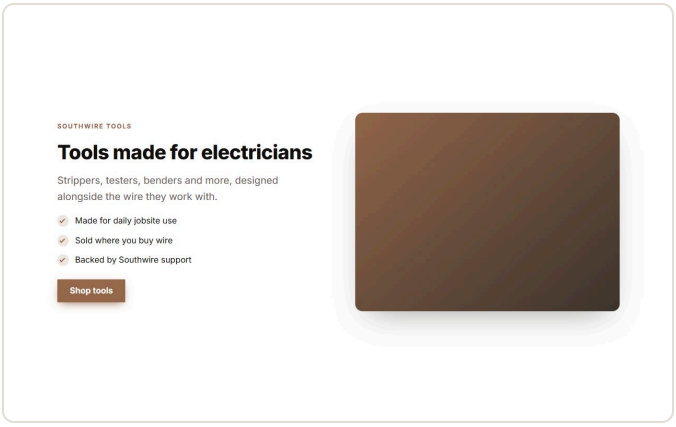

A banner with a muted, looping background video behind the headline, a still image while it loads, and a pause button.

USE IT FOR

Brand moments like Made Possible, plant or jobsite footage.

OPTIONS

MP4 video · poster image · overlay color and strength · left or centered

Split Hero

No JavaScript

Copy and buttons on one side, a photo on the other, with optional checkmark bullets. Stacks neatly on phones.

USE IT FOR

Product family intros, services, landing pages.

OPTIONS

Image left or right · image shape · bullets · two buttons · background

Footage in Type

No JavaScript

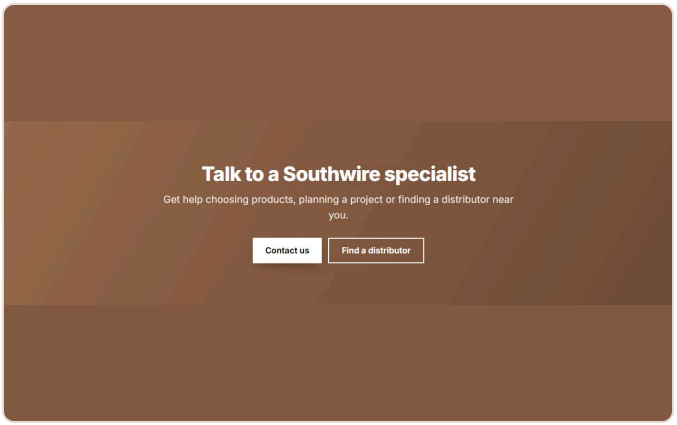

A huge headline with video, a photo or a moving copper sheen showing through the letters. The heading stays real text for search.

USE IT FOR

A bold opener for a campaign or brand page.

OPTIONS

Video, photo or copper fill · all caps · row sizing · brightness

CTA Banner

No JavaScript

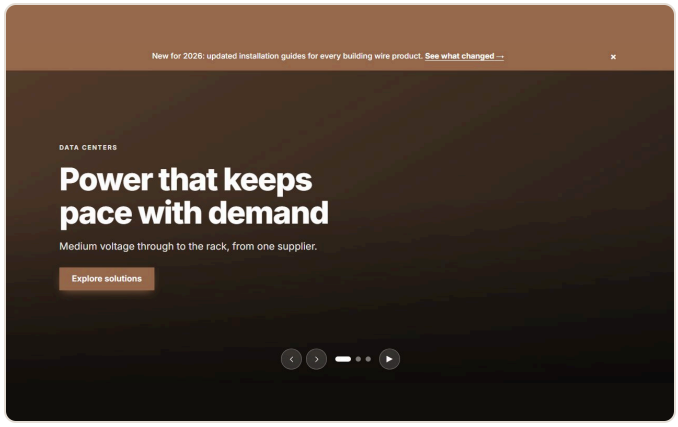

A closing call-to-action strip on a brand gradient, solid color, photo or soft tint.

USE IT FOR

Contact a rep, request a quote, find a distributor.

OPTIONS

Gradient, color, image or tint · stacked or side by side · inset card

Announcement Bar

A thin strip across the top for a launch, a notice or an event, with a link. Visitors can close it.

USE IT FOR

Product launches, trade-show booths, holiday hours, notices.

OPTIONS

Brand, dark, quiet or warning tone · centered or left · closable

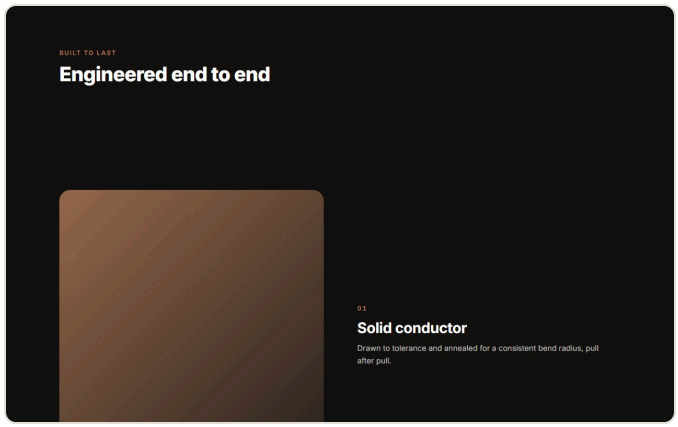

Tip: one hero per page

Start each page with one hero. The Announcement Bar sits above it for launches, trade shows or notices, and the CTA Banner closes the page.

6 BLOCKS

Product Showcase

Built for product pages: the story of a product, its colors and specs, its downloads, and where to buy it.

Pinned Product Scroller

No JavaScript

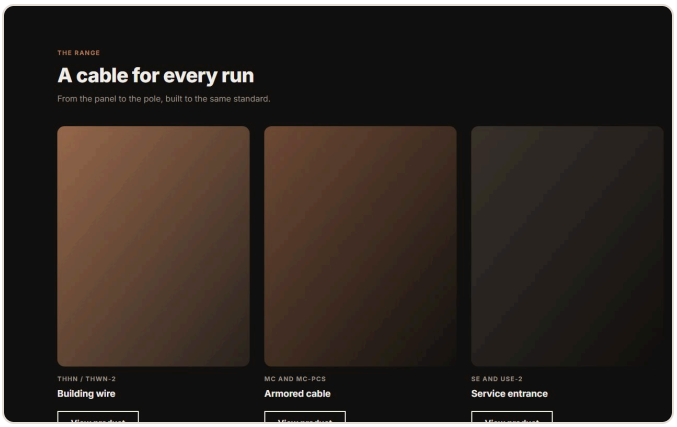

The product image stays pinned while the story scrolls past it, changing the picture at each step.

USE IT FOR

Walk through a product's features, layer by layer.

OPTIONS

Product left or right · a picture per step · scroll distance

Sideways Showcase

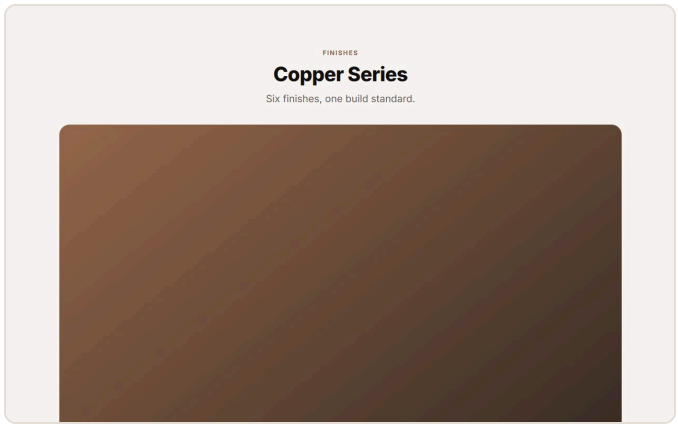

As you scroll down, a row of products glides sideways past the screen, then the page carries on. Sits still when there are three or fewer.

USE IT FOR

A product lineup: cable types, tool families.

OPTIONS

Card size and shape · progress line · transparent product PNGs

Finish Switcher

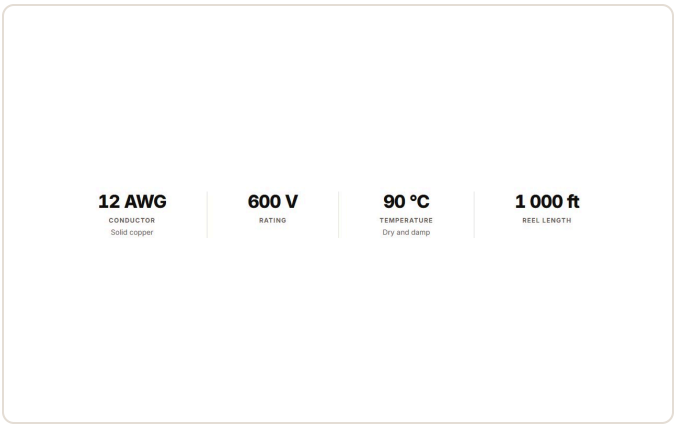

Color swatches that switch the product photo. Works with no JavaScript and with a keyboard.

USE IT FOR

Jacket colors, tool finishes, product variants.

OPTIONS

Swatches · product above or beside the copy · show the color name

Spec Strip

No JavaScript

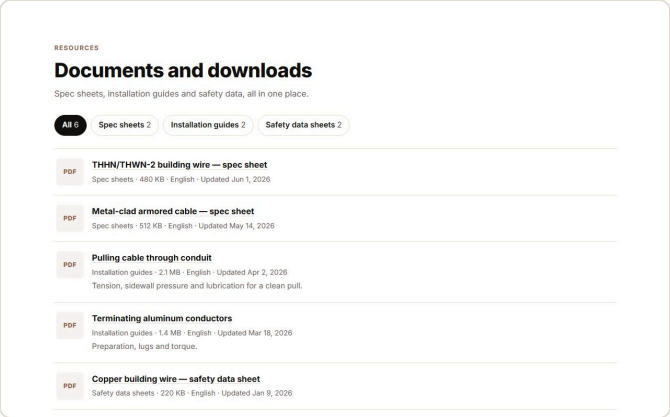

A clean row of key specs: the numbers buyers scan for first.

USE IT FOR

Conductor size, voltage rating, temperature rating, reel length.

OPTIONS

Centered or left · dividers · value size

Resource Library

No JavaScript

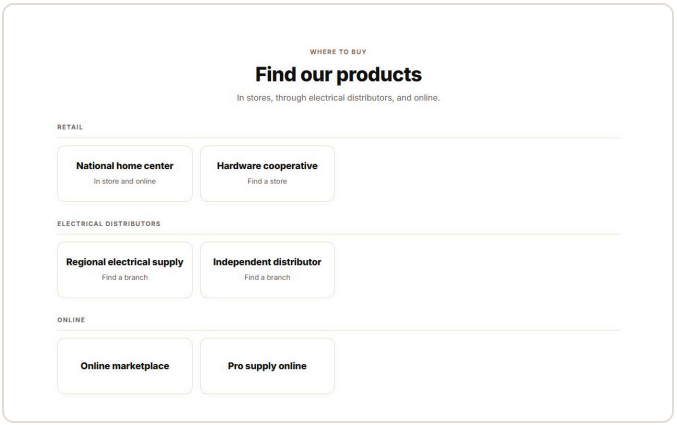

Spec sheets, installation guides and safety data sheets, filterable by category, with file type, size and date.

USE IT FOR

Downloads on product pages, the technical library.

OPTIONS

Category filter · list or cards · open in a new tab

Where to Buy

No JavaScript

Retailers, distributors and online sellers as logo tiles, grouped by the kind of seller.

USE IT FOR

Every product page, and the Where to Buy page.

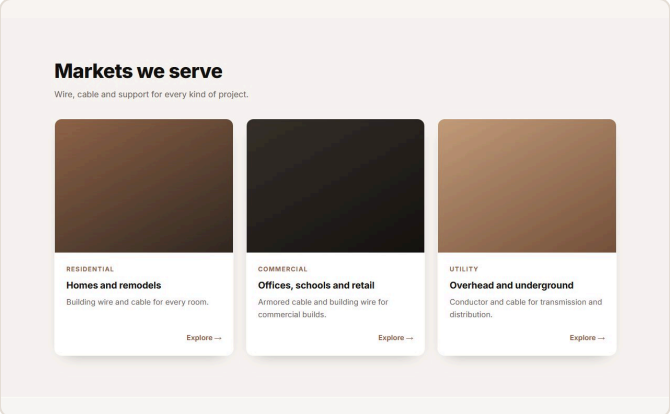

OPTIONS

Group by seller type · tiles per row · tile style

12 BLOCKS

Content

The everyday sections: cards, features, numbers, tables, articles, how-tos, people and training.

Card Grid

No JavaScript

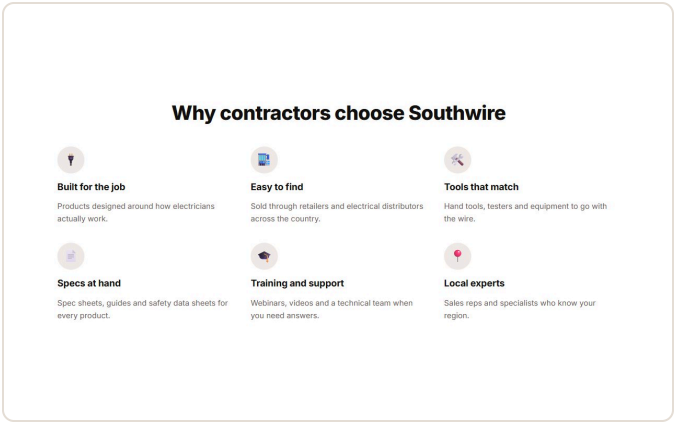

A grid of cards with image, label, title, text and link. The whole card is clickable. Several styles, including text over the photo.

USE IT FOR

Markets, product categories, news, case studies.

OPTIONS

1–4 columns · elevated, outlined, flat or text-over-image · button links · image tint

Feature Grid

No JavaScript

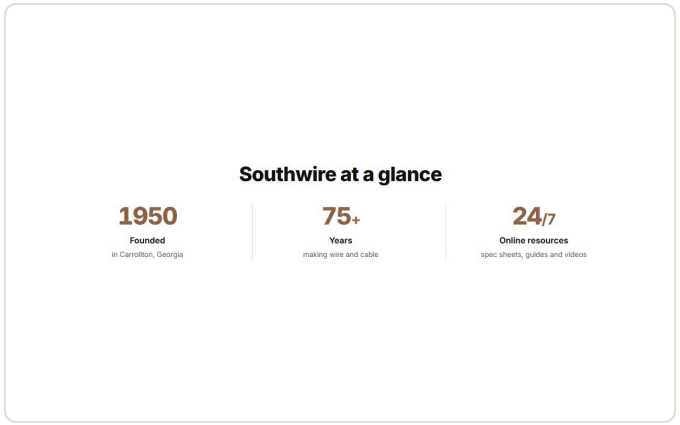

Short benefits, each with an icon, a title and a line of text.

USE IT FOR

Why Southwire, product benefits, services.

OPTIONS

Icon styles · cards or plain · columns · left or centered

Stats Counter

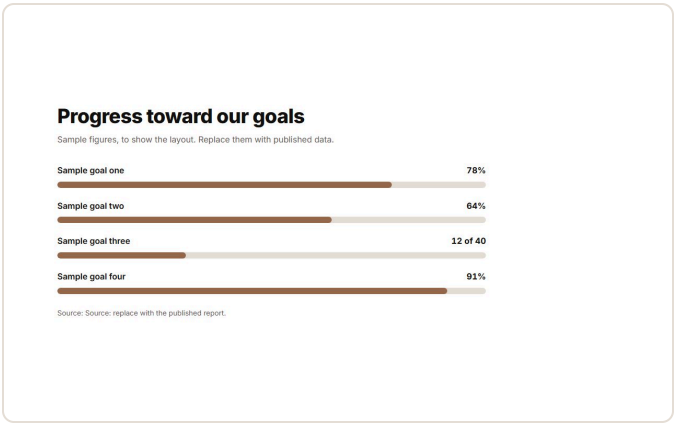

Big numbers that count up as they scroll into view, with a label under each.

USE IT FOR

Company facts, project results, milestones.

OPTIONS

Columns · dividers · number color · count speed

Data Bars

No JavaScript

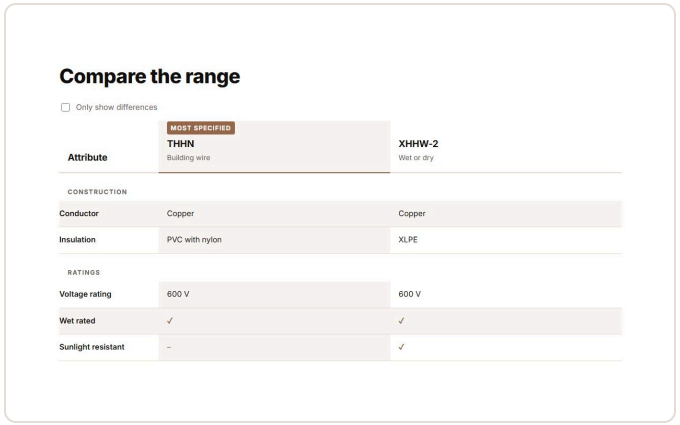

Figures drawn as bars or rings, with a source line. Starts empty, because every number in it is a claim.

USE IT FOR

Sustainability goals, test results, progress toward targets.

OPTIONS

Bars or rings · brand or text color · source note

Table

No JavaScript

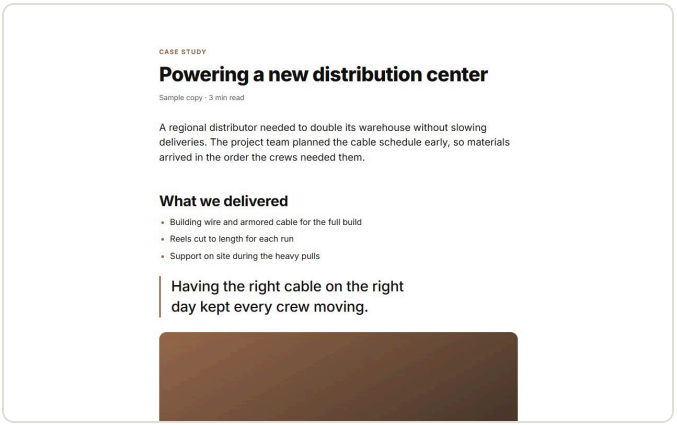

Paste cells straight from Excel. Product columns, sticky row labels, Yes/No as checkmarks and a "show only differences" filter.

USE IT FOR

Spec tables, product comparisons, ampacity charts.

OPTIONS

Paste from a spreadsheet · banded rows · column images · differences filter

Article

No JavaScript

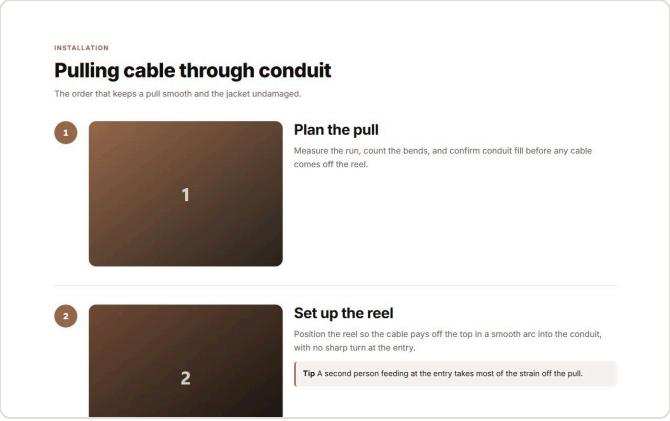

Long-form text with a simple editor: headings, sizes, alignment, palette colors, lists, quotes, links and images.

USE IT FOR

Case studies, news, guides, policies.

OPTIONS

Left, centered or justified · one or two columns · reading or full width

Step-by-Step

No JavaScript

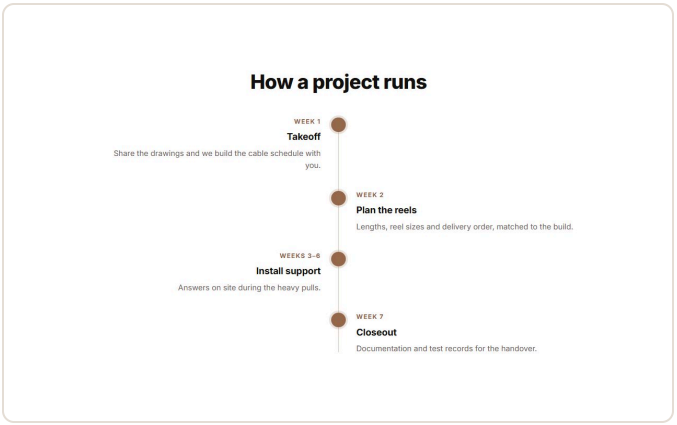

Numbered how-to steps with pictures, plus tip and caution callouts. Can describe the steps to search engines.

USE IT FOR

Installation guides, how to pull cable.

OPTIONS

Stacked or side by side · images · time it takes

Timeline

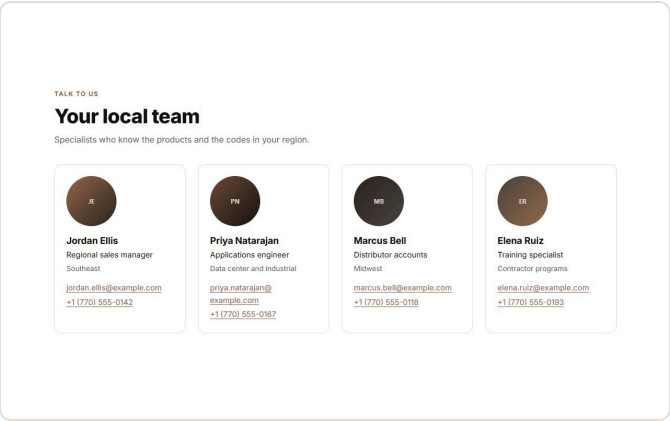

Milestones along a connecting line, alternating sides or in a single column.

USE IT FOR

Company history, project phases, goals by year.

OPTIONS

Alternating or single · dot, number or ring markers · reveal on scroll

People

No JavaScript

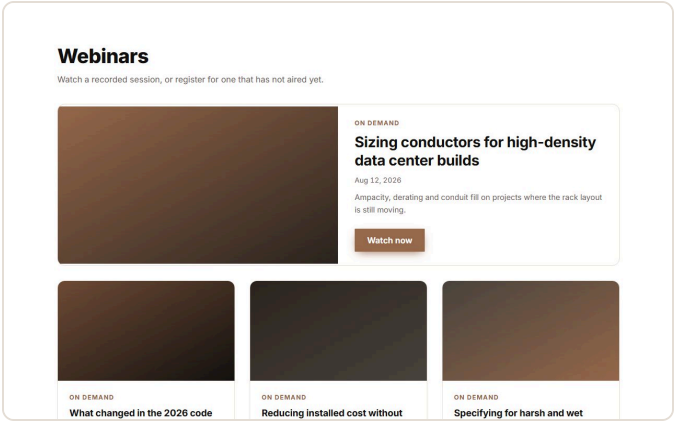

Photo cards for reps or leaders, with role, territory and email and phone links that work.

USE IT FOR

Sales reps, specialists, leadership.

OPTIONS

Round or square photos · columns · card style

Webinar Library

No JavaScript

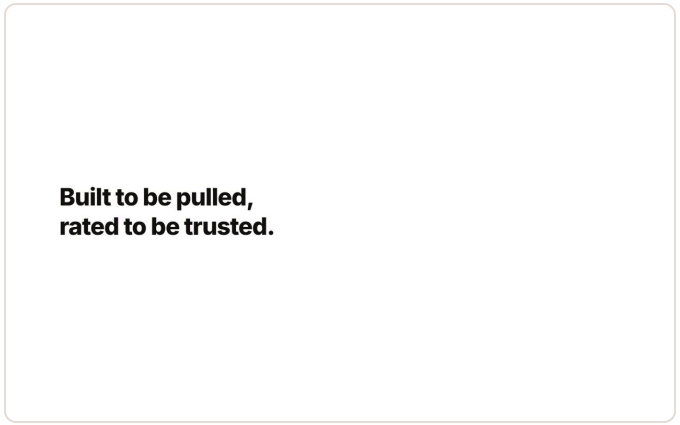

Recorded and upcoming webinars, newest first, with a featured session on top.

USE IT FOR

Training, continuing education, product webinars.

OPTIONS

Order · featured first · thumbnail shape · columns

Kinetic Text Reveal

No JavaScript

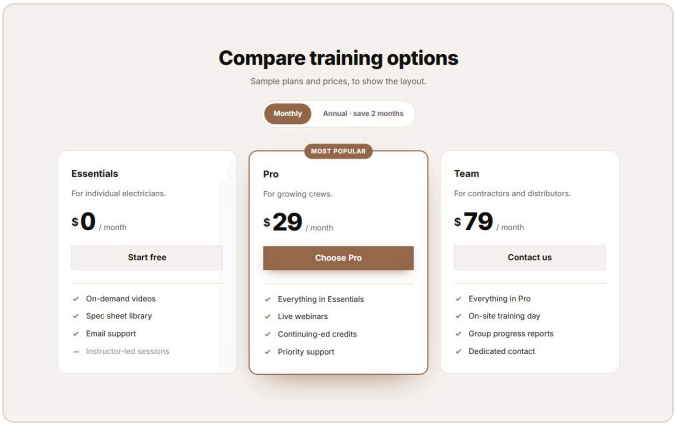

A statement that builds line by line, word by word or letter by letter as it scrolls into view.

USE IT FOR

A mission line or campaign message between sections.

OPTIONS

By line, word or letter · direction · blur · stagger

Pricing Table

Side-by-side plans with a highlighted option and a monthly or annual switch.

USE IT FOR

Service tiers, training packages, subscriptions.

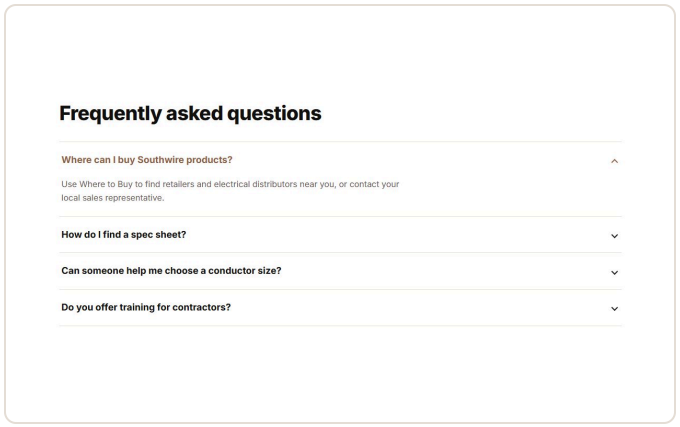

OPTIONS

Highlighted plan · badge · monthly/annual switch

9 BLOCKS

Interactive

Blocks people use, not just read: FAQs, tabs, a clickable diagram, a territory map and a voltage drop calculator.

Accordion / FAQ

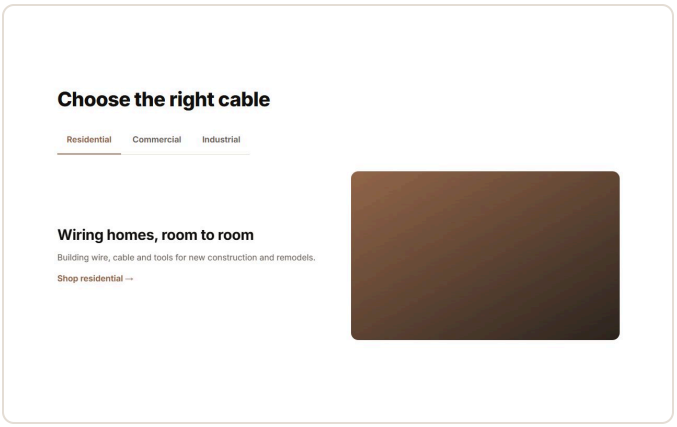

Questions that open to show their answers. Each answer can have its own link, and the block can tell Google it is an FAQ.

USE IT FOR

Product FAQs, ordering and support questions.

OPTIONS

Lines, cards or a box · one or many open · FAQ data for search

Tabs

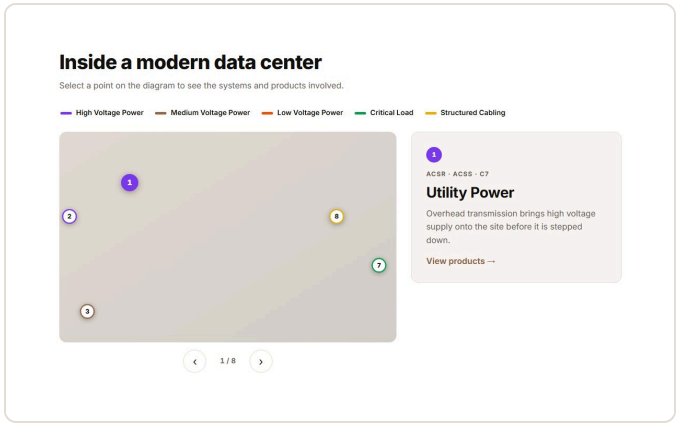

Content switched by tabs, with an optional image beside each panel.

USE IT FOR

Applications by market, product variants.

OPTIONS

Underline, pills or segmented · text with image · link to a tab

Interactive Diagram

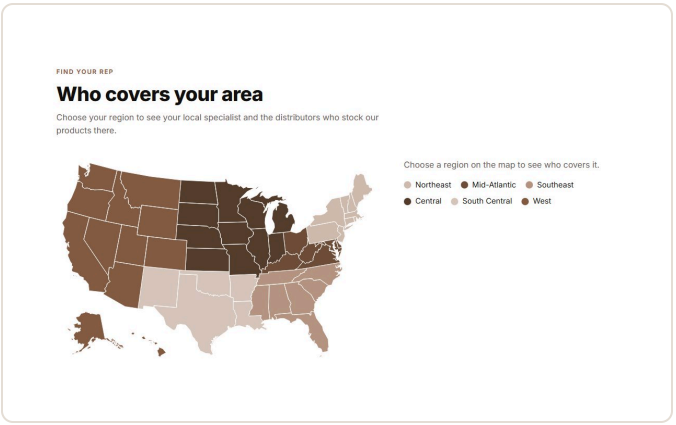

Numbered hotspots over an image. Select one to see details and a photo, with a legend that filters by category.

USE IT FOR

Inside a data center, parts of a cable, a jobsite.

OPTIONS

Details beside or below · zoom on select · legend filter · photos in details

Territory Map

No JavaScript

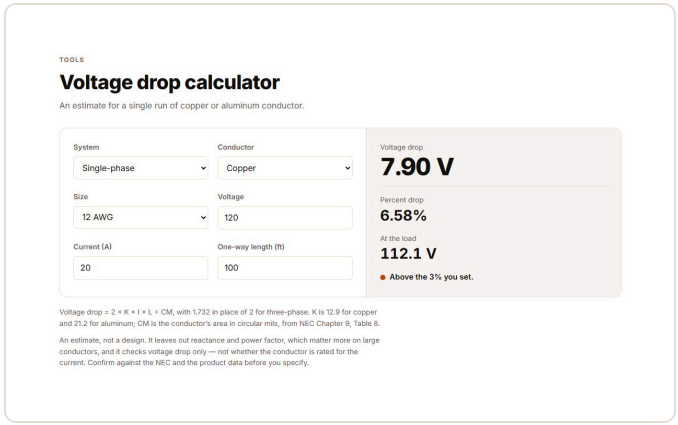

A US map by sales territory. Tap a region to see who covers it and where to buy there. No JavaScript.

USE IT FOR

Find a rep, distributor coverage, locations.

OPTIONS

Territories with reps and distributors · details beside or below

Voltage Drop Calculator

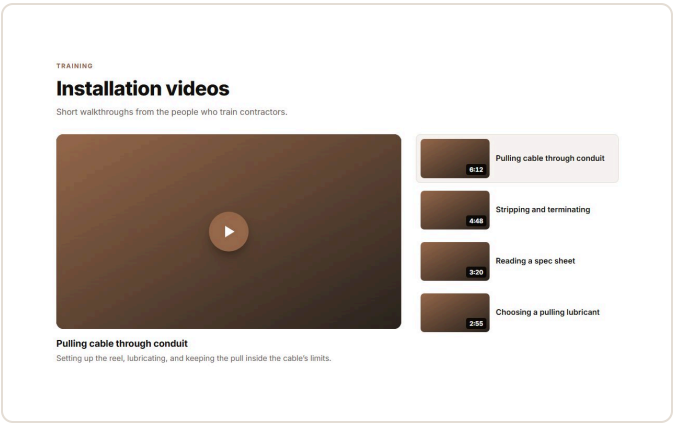

Estimates voltage drop for one run of copper or aluminum conductor, and flags drops above your limit.

USE IT FOR

Contractor resources, building wire pages.

OPTIONS

Single or three phase · copper or aluminum · 14 AWG to 750 kcmil · drop limit

Video Library

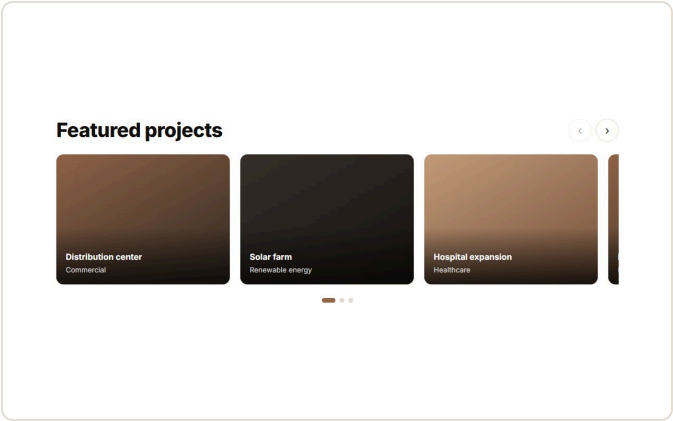

One video player with a playlist beside it. Nothing loads from YouTube or Vimeo until someone presses play.

USE IT FOR

Training and how-to videos, product demos.

OPTIONS

YouTube or Vimeo · list beside or under · custom thumbnails

Carousel

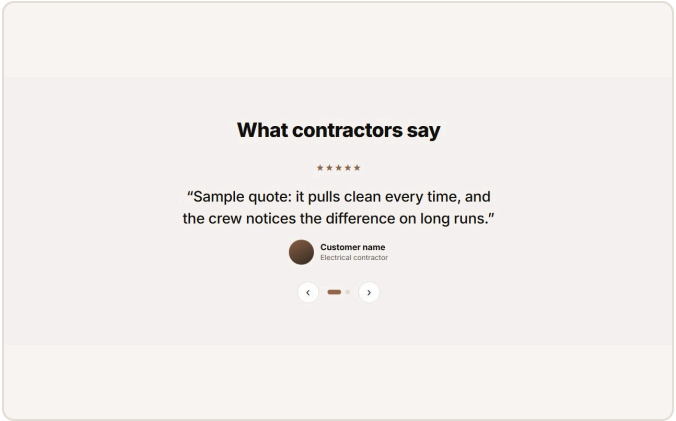

A swipeable row of images or product cards, with arrows and dots.

USE IT FOR

Featured projects or products.

OPTIONS

Images or product cards · slides per view · autoplay

Testimonial Slider

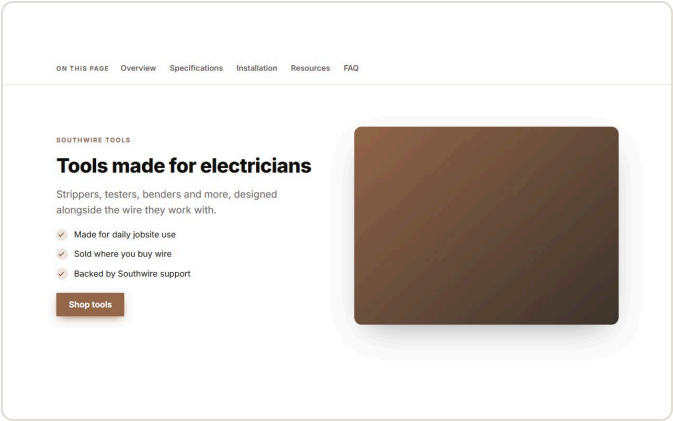

Rotating quotes with photo, name, role and star rating.

USE IT FOR

Contractor and partner quotes.

OPTIONS

Centered or card · auto-rotate timing

Jump Links

A bar of links to sections further down a long page. It can stick to the top and highlight where you are.

USE IT FOR

Long product, resource or market pages.

OPTIONS

Sticky · highlight current section · tabs or pills

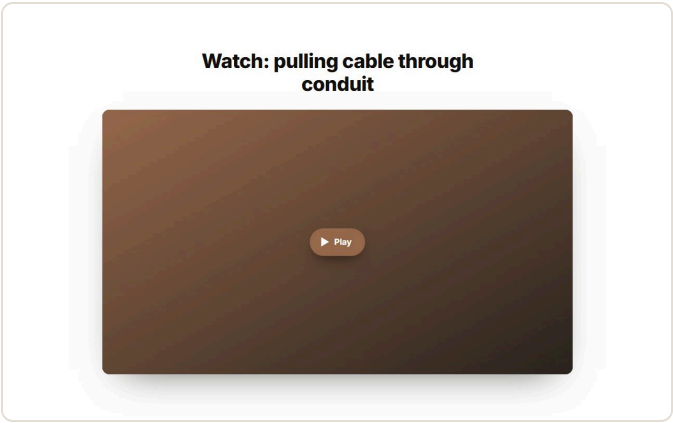

Tip: check SmartEdit first

Blocks without the "No JavaScript" mark use scripts for some of what they do. Before relying on them in SmartEdit, paste the markup check (tools/markup-check.html) to see what SmartEdit keeps.

6 BLOCKS

Media & Utility

Video, photos, logos, events and countdowns.

Video Embed (lite)

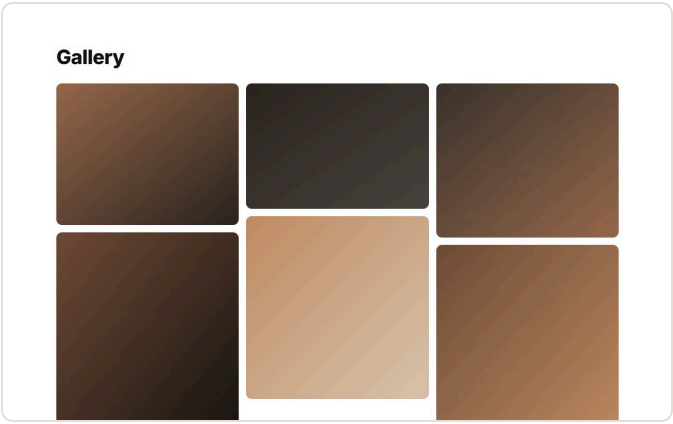

A YouTube or Vimeo video that loads only when someone presses play, so the page stays fast.

USE IT FOR

Any single video.

OPTIONS

Custom poster · aspect ratio · play button style

Gallery + Lightbox

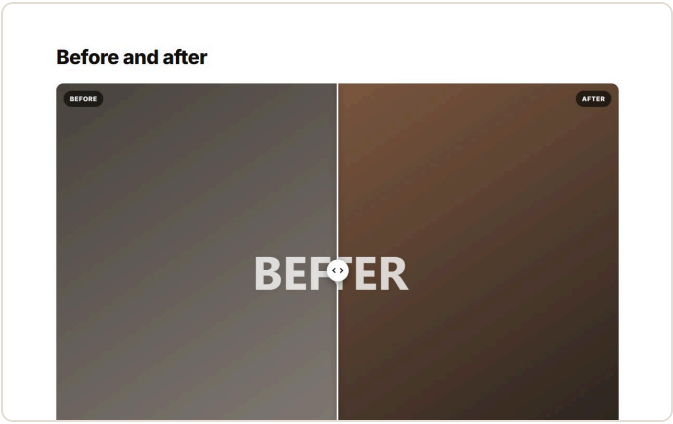

A photo grid that opens full screen when a photo is clicked.

USE IT FOR

Project photos, events, community work.

OPTIONS

Masonry or even grid · columns · captions · lightbox

Before / After Slider

Drag a handle to compare two photos. Works with the keyboard too.

USE IT FOR

Retrofits, old versus new, project progress.

OPTIONS

Labels · starting position · aspect ratio

Logo Marquee

No JavaScript

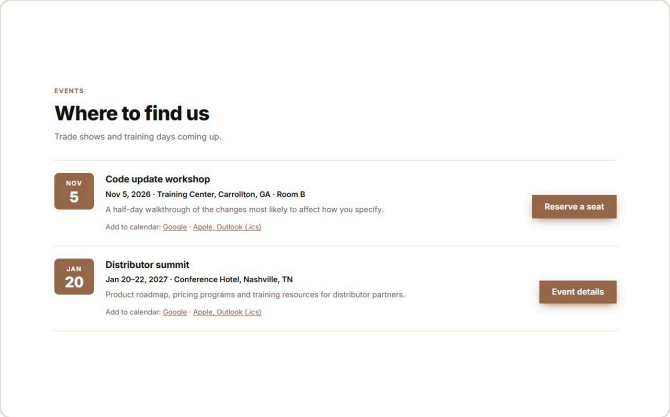

A row of logos that scrolls continuously, or sits still in a wrapping row.

USE IT FOR

Brands, partners, certifications.

OPTIONS

Scrolling or still · speed and direction · grayscale until hover

Events

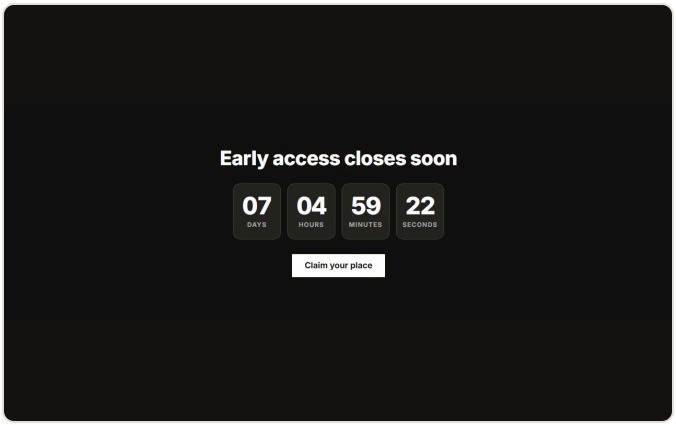

Trade shows and training days, soonest first, with add-to-calendar links. Past events hide themselves.

USE IT FOR

Trade shows, training, career fairs.

OPTIONS

Order · hide ended events · add to calendar

Countdown Timer

Counts down to a date and time, then shows a message, hides itself or holds at zero.

USE IT FOR

Product launches, trade shows, webinar start times.

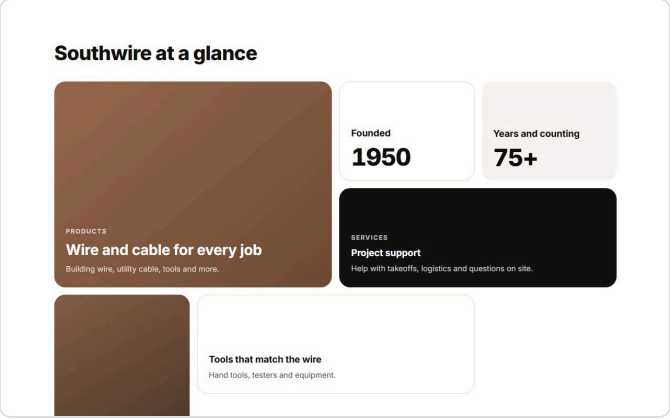

OPTIONS

Boxed, plain or split-flap digits · what happens at zero

4 BLOCKS

Modern Layout

Contemporary layouts with scroll effects that make a page feel designed rather than assembled.

Bento Grid

No JavaScript

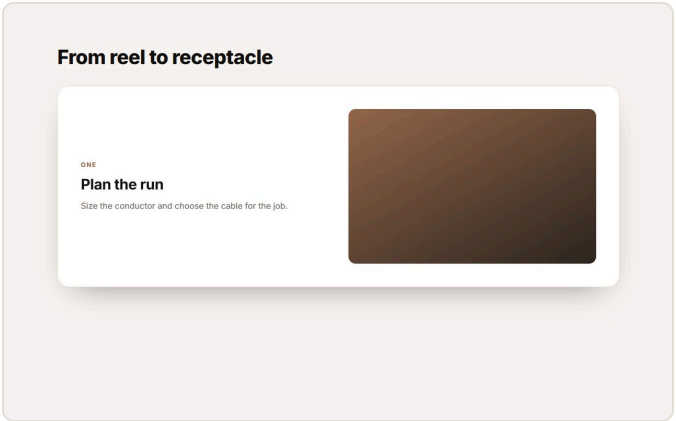

Tiles of different sizes in a modern mosaic: big statements, numbers, photos and short notes.

USE IT FOR

Homepage highlights, capabilities at a glance.

OPTIONS

Columns · row height · tile sizes and tones

Sticky Stacking Cards

No JavaScript

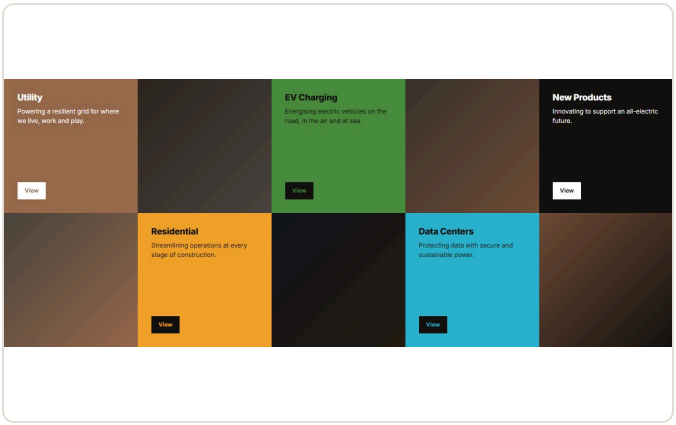

Cards that pin and stack on top of each other as you scroll.

USE IT FOR

A process, solutions for a market, reasons to choose.

OPTIONS

Text with image or text only · card height · shrink as covered

Mosaic Grid

No JavaScript

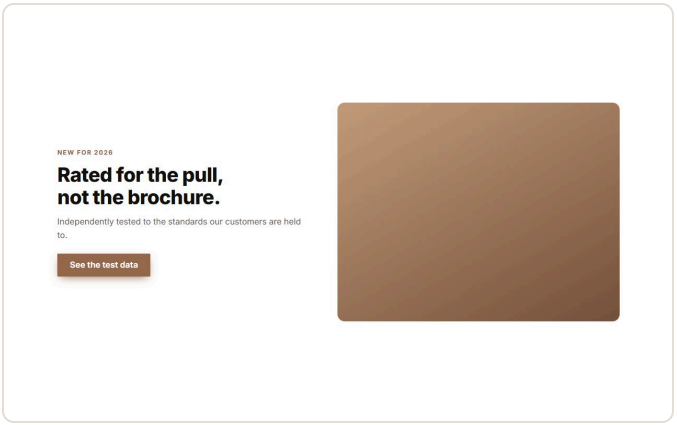

A flush checkerboard of colored tiles and photos, each with a short message and button.

USE IT FOR

Markets or product categories with a bold look.

OPTIONS

Columns · tile shape · full bleed · zoom on hover

Split Reveal

No JavaScript

A colored cover opens like blinds as you scroll, revealing the message and photo behind it.

USE IT FOR

A dramatic reveal for a launch or key message.

OPTIONS

Cover color or image · blinds or doors · slat order

Every block also lets you

- Follow the page's light or dark scheme, or set its own
- Change corner rounding, spacing and heading size
- Hide it on phones, or on desktop
- Fade or slide it in as it scrolls into view
- Give it an anchor for links that jump straight to it
- Paste it twice on one page without the two clashing

PUTTING PAGES TOGETHER

Page templates

Four starters sit above the block list in the tool. Each drops in a ready arrangement you can edit down.

Landing page

Hero, proof, features, questions, close

Hero Slider → Stats Counter → Feature Grid → Testimonial Slider → Accordion / FAQ → CTA Banner

Product page

The product, its story, its options and specs

Parallax Banner → Pinned Product Scroller → Finish Switcher → Spec Strip → CTA Banner

Capability page

What we do, shown on a diagram, with a timeline

Split Hero → Interactive Diagram → Feature Grid → Timeline → CTA Banner

Support page

Answers, a walkthrough video and a way to get help

Split Hero → Accordion / FAQ → Video Embed (lite) → CTA Banner
